Lab 01 - Replace Visuals and Establish a Theme

Course: Articulate Storyline 360 Masterclass (C1058) Version: v1.0 · 2 October 2026

Scenario

Creative Minds is adapting a camping orientation template for a new learning campaign and needs a consistent visual identity without rebuilding the course.

Objective

Replace supplied media and harmonise the project theme while preserving scene structure and navigation.

Supplied Articulate Storyline files

- 03_01_BEGIN.story
- 03_01_END.story

Detailed procedure

1. Copy 03_01_BEGIN.story to a new working file; keep the BEGIN and END files untouched as the baseline and reference.
2. Open the working copy from a local Windows drive and review all three slides in Story View and Slide View.
3. Record the current theme fonts, theme colours, slide size, layouts and player before making changes.
4. Use Replace Picture or the Media Library to substitute the relevant camping visuals without changing object geometry.
5. Apply a coherent font and colour theme; use repetition, alignment and balance to establish a predictable visual system.
6. Check every replaced picture for crop, aspect ratio, focal point and alternative text.
7. Review the slides in grayscale and at delivery size to confirm hierarchy and meaning do not depend on colour alone.
8. Preview the full scene and confirm the Begin control and navigation still work.
9. Compare your result against 03_01_END.story; note one deliberate difference and why it improves the brief.
10. Save as Lab-01-YourName.story in this lab folder.

Evidence to retain

Retain the working .story file plus screenshots of Story View, one edited slide and the theme settings.

Acceptance criteria

[ ] Both original BEGIN and END .story files remain unchanged.

[ ] All replaced media preserves aspect ratio and readable composition.

[ ] Theme choices demonstrate contrast, repetition, alignment and balance.

[ ] Hierarchy remains clear in grayscale and navigation behaves as before.

Reflection prompts

- Which storyboard or audience requirement drove your most important decision?
- Which Storyline panel, trigger or setting proves that decision is implemented?
- What accessibility, rights or publishing evidence must accompany the finished project?
