Lab 02 - Populate the Storyboard with Course Content

Course: Articulate Storyline 360 Masterclass (C1058) Version: v1.0 · 2 October 2026

Scenario

The same camping course now needs meaningful module descriptions and supporting imagery before stakeholder review.

Objective

Turn a skeletal template into a storyboard-aligned three-slide course overview using reusable project assets.

Supplied Articulate Storyline files

- 03_02_BEGIN.story
- 03_02_END.story

Detailed procedure

1. Create Lab-02-YourName.story from 03_02_BEGIN.story and open it locally.
2. Review the learning promise and define the purpose of each of the three slides.
3. State the performance gap, required learner action and one measure that would show improvement.
4. Write concise learner-facing descriptions for campsite selection, campfire safety and essential toiletries.
5. Import or replace the supplied supporting pictures through the Media Library so assets remain traceable.
6. Use slide titles, hierarchy, alignment and spacing to make the intended reading order obvious.
7. Add meaningful alternative text; remove decorative objects from the focus order where appropriate.
8. Preview each slide at Fit and 100% zoom and test keyboard focus order.
9. Treat the three-slide build as a prototype: ask one reviewer to test the live navigation and record accept/adapt/reject decisions.
10. Compare against 03_02_END.story and record how the storyboard maps to the prototype content.
11. Save the completed working file and evidence screenshots.

Evidence to retain

Retain the completed .story file, a three-screen storyboard table and accessibility/focus-order screenshots.

Acceptance criteria

[ ] The performance gap, learner action and success measure are explicit.

[ ] Each slide has one clear purpose and concise copy.

[ ] Focus order and alternative text support meaningful navigation.

[ ] Reviewer decisions and the resulting prototype revision are traceable.

Reflection prompts

- Which storyboard or audience requirement drove your most important decision?
- Which Storyline panel, trigger or setting proves that decision is implemented?
- What accessibility, rights or publishing evidence must accompany the finished project?
