Lab 03 - Curate and Replace Audience-Fit Media

Course: Articulate Storyline 360 Masterclass (C1058) Version: v1.0 · 2 October 2026

Scenario

Stakeholder feedback says the first visual set does not fit new campers in a contemporary learning context.

Objective

Evaluate customer preferences, select a suitable visual style and replace project assets consistently.

Supplied Articulate Storyline files

- 04_01_BEGIN.story
- 04_01_END.story

Detailed procedure

1. Create Lab-03-YourName.story from 04_01_BEGIN.story.
2. Define the audience, device, tone, cultural context and visual-selection criteria in the evidence sheet.
3. Open the Media Library and identify the assets used by each slide.
4. Select replacement visuals that match the criteria and have permitted usage rights.
5. Replace the assets through Storyline so all linked uses and crops can be checked.
6. Correct crop, position, contrast and hierarchy on each affected slide.
7. Update alternative text and remove purely decorative imagery from the accessibility tree.
8. Preview on desktop and responsive player views; inspect for missing media or unintended stretching.
9. Compare with 04_01_END.story, save the completed .story file and record source/licence evidence.

Evidence to retain

Retain the completed .story file, audience requirements matrix, asset/source register and before/after screenshots.

Acceptance criteria

[ ] Visual choices trace to audience requirements.

[ ] No picture is stretched or visibly pixelated.

[ ] Rights/provenance are documented.

[ ] Alternative text and focus order are appropriate.

Reflection prompts

- Which storyboard or audience requirement drove your most important decision?
- Which Storyline panel, trigger or setting proves that decision is implemented?
- What accessibility, rights or publishing evidence must accompany the finished project?
