Lab 04 - Create and Govern an AI-Assisted Visual Variation

Course: Articulate Storyline 360 Masterclass (C1058) Version: v1.0 · 2 October 2026

Scenario

Creative Minds wants to test a western-poster visual direction without losing the approved baseline or provenance record.

Objective

Create an AI-assisted visual variation, evaluate it against the brief and retain transparent provenance evidence.

Supplied Articulate Storyline files

- 04_02_BEGIN.story
- 04_02_END.story

Detailed procedure

1. Create Lab-04-YourName.story from 04_02_BEGIN.story and preserve the supplied baseline.
2. Write an image brief covering subject, style, composition, audience, rights constraints and prohibited content.
3. Use the approved Storyline/Articulate image-generation feature or a trainer-approved image source.
4. Record the exact prompt, generation date, selected variation and any reference-image permissions.
5. Insert or replace the visual without stretching and adjust crop so the focal point supports the message.
6. Review hands, objects, cultural details, accidental text, bias, plausibility and brand suitability.
7. Add alternative text that communicates instructional meaning rather than the generation method.
8. Compare with 04_02_END.story, explain whether the western-poster direction should be accepted, adapted or rejected.
9. Save the .story file and the provenance/evaluation evidence.

Evidence to retain

Retain the completed .story file, prompt/provenance record, evaluation checklist and before/after screenshots.

Acceptance criteria

[ ] A baseline remains available for comparison.

[ ] The visual is technically plausible and free of accidental text/logos.

[ ] The decision is justified against audience and brand criteria.

[ ] Provenance and rights evidence are complete.

Reflection prompts

- Which storyboard or audience requirement drove your most important decision?
- Which Storyline panel, trigger or setting proves that decision is implemented?
- What accessibility, rights or publishing evidence must accompany the finished project?
