Lab 05 - Add Narration and Closed Captions

Course: Articulate Storyline 360 Masterclass (C1058) Version: v1.0 · 2 October 2026

Scenario

The course needs optional narration for guidance and accurate captions for learners in noisy or hearing-limited contexts.

Objective

Add and synchronise narration, captions and accessible playback controls without duplicating unnecessary on-screen text.

Supplied Articulate Storyline files

- 05_01_BEGIN.story
- 05_01_END.story

Detailed procedure

1. Create Lab-05-YourName.story from 05_01_BEGIN.story.
2. Review the narration script and mark pronunciation, pause and emphasis cues.
3. Prepare the recording space: silence notifications and noise sources, avoid echo, position the microphone and run a short level test.
4. Rehearse the complete screen path with every application and source file open at the intended recording size.
5. Import or record narration on the intended slide and inspect the waveform.
6. Trim silence, normalise perceived level and add short fades where needed.
7. Import or create the supplied VTT captions and correct timing, wording, speaker identification and meaningful sound cues.
8. Provide a transcript or accessible step-based equivalent that also explains instructional actions shown only on screen.
9. Confirm the player exposes captions and that keyboard users can operate the control.
10. Align object timing to narration using the playhead or cue points where appropriate.
11. Preview with audio on, audio muted and captions on; check that captions do not cover essential content.
12. Compare with 05_01_END.story and save the completed .story file and evidence.

Evidence to retain

Retain the completed .story file, caption-timing screenshot, waveform/timeline screenshot and accessibility test record.

Acceptance criteria

[ ] Narration is intelligible, synchronised and free of avoidable recording distractions.

[ ] Captions accurately represent speech, speakers and meaningful sound.

[ ] Playback is learner-controlled and an equivalent transcript/job aid covers visual actions.

[ ] On-screen text and narration avoid unnecessary duplication.

Reflection prompts

- Which storyboard or audience requirement drove your most important decision?
- Which Storyline panel, trigger or setting proves that decision is implemented?
- What accessibility, rights or publishing evidence must accompany the finished project?
