Lab 06 - Build a Multi-Slide Audio and Caption System

Course: Articulate Storyline 360 Masterclass (C1058) Version: v1.0 · 2 October 2026

Scenario

A three-slide course needs consistent narration, caption files and learner control across the whole scene.

Objective

Implement multiple audio/caption tracks consistently and validate timing, focus and playback behaviour across slides.

Supplied Articulate Storyline files

- 05_02_BEGIN.story
- 05_02_END.story

Detailed procedure

1. Create Lab-06-YourName.story from 05_02_BEGIN.story.
2. Inventory the supplied MP3 and VTT assets and map each pair to its target slide.
3. Import each narration track and apply a consistent naming convention in the timeline and Media Library.
4. Attach the matching caption file and correct text/timing errors.
5. Set playback and slide-advance behaviour so narration is neither cut off nor repeated unexpectedly.
6. Expose caption, volume, pause and seek controls consistently in the player; do not force autoplay.
7. Attach or link an accessible transcript that includes relevant visual-action descriptions.
8. Verify focus order, alternative text and accessible object visibility on every slide.
9. Preview the complete scene using normal navigation, replay and revisit; log any resume differences.
10. Compare with 05_02_END.story, save the completed .story file and test matrix.

Evidence to retain

Retain the completed .story file, media map, scene-wide audio/caption test matrix and representative screenshots.

Acceptance criteria

[ ] All audio, captions and transcript equivalents map to the correct slides.

[ ] Naming and learner-controlled playback behaviour are consistent.

[ ] Revisit/replay does not create overlapping or missing narration.

[ ] Keyboard, focus and caption checks pass on every slide.

Reflection prompts

- Which storyboard or audience requirement drove your most important decision?
- Which Storyline panel, trigger or setting proves that decision is implemented?
- What accessibility, rights or publishing evidence must accompany the finished project?
